TIMBA sanding machine

The new sanding machine TIMBA is able to do, on any type of wood floor, jobs that traditionally are made with 3 different machines:

Smooth like a traditional belt sanding machine.

Finishes the floors like a monobrush.

Sands up to the skirting boards of the walls like a edge machine.

Sanding Dust Free !

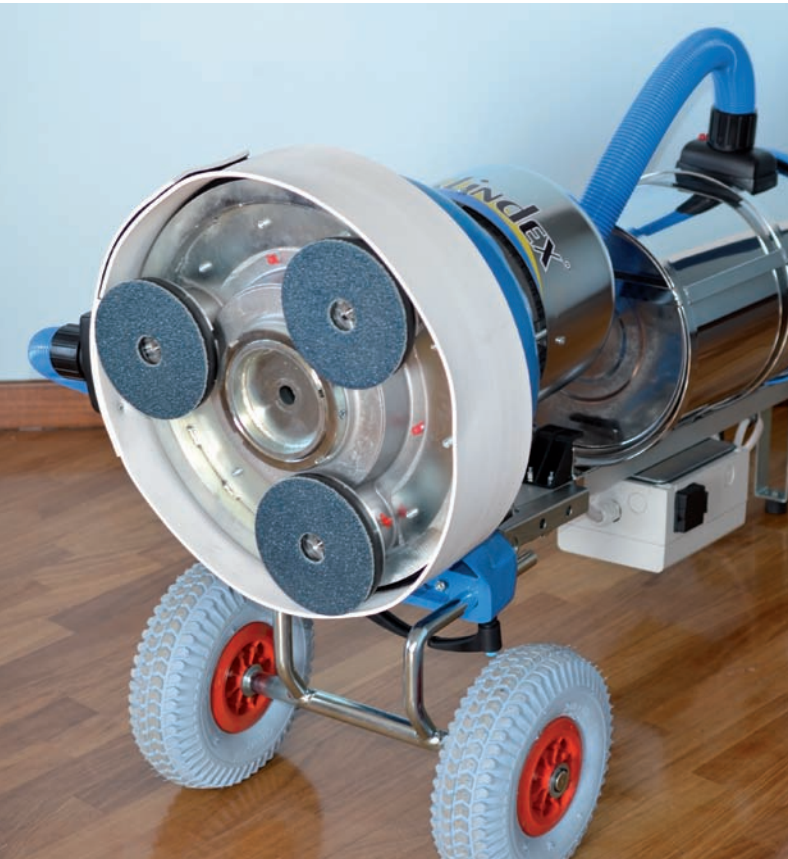

Dust free thanks to the vacuum kit system.

Multi directional workability thanks to the 360° directional wheels that allows the machine to move in any direction.

Excellent sanding.

Brilliant finishing.

Light and easy to use and doesn't need special training.

**It sands very close to the wall
avoiding the use of edge machine.**

It can also work in narrow areas.
It reduces the working time.

**It can also work
as a monobrush!**

TIMBA can use:

Mesh discs for finishing.
Cleaning discs.
Double sided sandpaper.
Carborundum.
All accessories for
monobrushes.

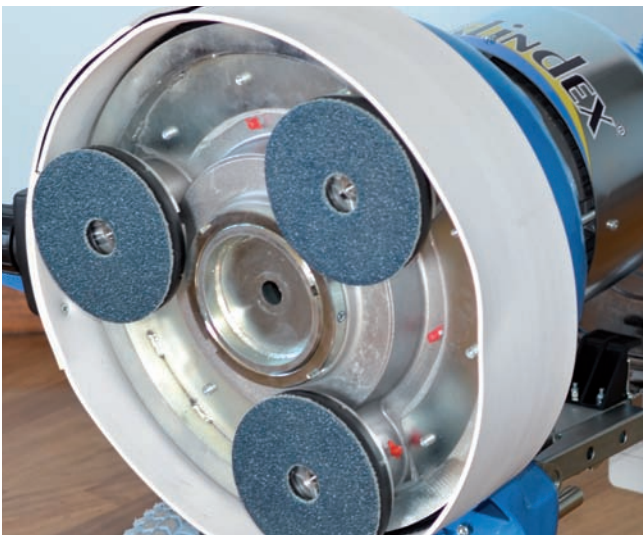

TIMBA sanding machine

Features that make the TIMBA sanding machine unique are in particular: the planetarium with tempered steel gears; the 360° wheels that allow a multidirectional workability. Klindex has been the first company in the world to use the spherical wheels on the grinding-polishing machines.

TIMBA can give the floors a perfect flatness avoided the “wave” effect.

New planetarium more compact and sturdy!

New spherical wheels reinforced and singularly damped.

Pneumatic wheels for easy transportation!

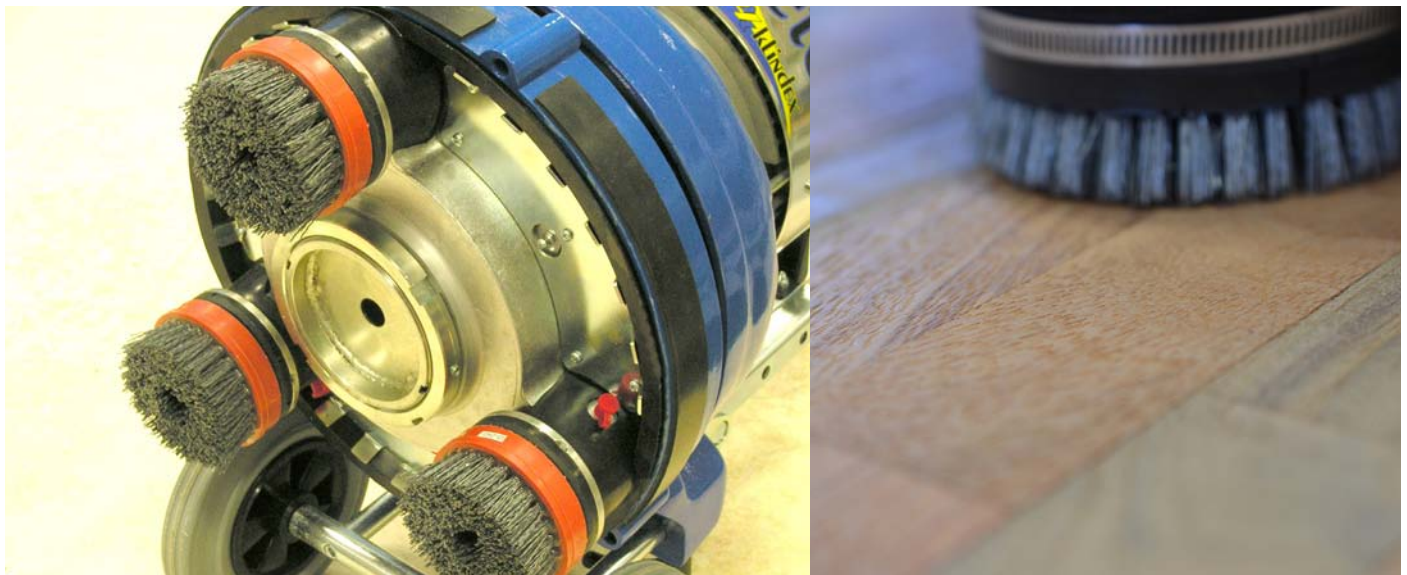

Possibility of a greater aggressiveness with extra weights!

TIMBA sanding machine

The complete system for antique look

Thanks to the complete range of accessories and discs, TIMBA satisfies the continuous requirements of the sanding world and more frequent demands for new finishes. Besides the traditional parquet sanding, by using sandpapers from grain 24 to grain 120, TIMBA is exceptionally efficacious also on all the types of pre-finished parquet. TIMBA, in fact, can remove the varnish layer leaving entirely intact the noble part of the wood, in order to guarantee the chance of re-sanding other 2 or 3 times. TIMBA does not leave signs and allows a good finishing since the first step. The following steps will allow the operator to save time guaranteeing an excellent result.

Timba is able to realize brushing on new installations or to restore existing brushed finishes. With the specific tools and the planetarium it is not necessary to follow the veins of the wood allowing to create antique effect also on mosaic parquet.

Besides the applications on wood, with the immense range of abrasives and diamond accessories, TIMBA can perform the following works: resins and glue removal; smoothing foundation ; foundation surplus removal ; scratch the ceramics and floor cleansing. All always dust free.

Sand paper 140mm.
Specific for sanding wood floors. Velcro attachment fast and safe.

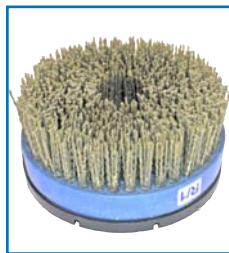

Pad Holder Ø=430mm
For double sided sandpaper.

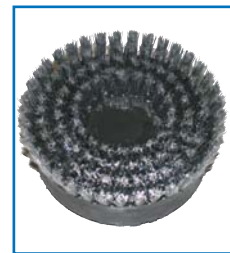

Double sided sandpaper Ø=430mm
