# The magic power of tidying up

FEDERICA FIORELLINI

years she has been going round the world as a consultant for desperate housewives on tidying up, but mainly working with managers and professionals. Naturally, I was somewhat skeptical. Halfway through I wanted to phone Alberto and ask him what he had found so interesting and useful about 'talking to' socks and thanking them for their hard day's work or throwing away books which no longer roused our emotions (a real taboo for me). I was furious. However, the more I read on, the more interesting the book became, and its usefulness became clearer. In fact, I fell in love with it and started to tell my friends about it because organizing spaces inside your home and freeing yourself of things which you no longer need, trains your instincts to identify what really gives you pleasure. Something which gives you an emotion helps to free the mind and makes you really feel better. What has parquet got to do with this? It is important because deciding what to keep (rather than what to get rid of) helps us focus on what interests us and what we value, use and want to have around us. If I really think about what makes me feel good at home, it is stretching out on the wood floor to read. Parquet represents for me exactly what I took from Kondo's book as my concept of order. It fills spaces, but with lightness. Please excuse this romantic ending, but it's a little like love, which fills your heart but does not take anything away from you, it only expands you.

I spent two weeks on the island of Giglio (Lily) in August. You could say that my son chose it as he was attracted by its flower name, but more so by the idea that he might find pirates there. However, to cut a long story short, apart from swimming (the sea is one of the most beautiful I have ever seen) and pirate hunting, there is not much to do on Giglio and so I decided to take plenty of books. While I was making a list of my summer reading, I thought about my friend Alberto Massimo's advice (he is export manager for Bona and it's pure chance that there is an interview with him in this edition). A few months earlier (during a coffee break at the last Fep conference in Budapest) he spoke to me about a book which, according to him would change my life. It was "*The life-changing magic of tidying up*" by Marie Kondo. Kondo is Japanese and very famous in her own country. For some

Comprised of three world-class tradeshows: Surfaces, StonExpo/ Marmomac, and Tile Expo events, The International Surface Event (TISE) is the industry marketplace for floorcovering, stone, and

tile industry professionals - offering four impressive days of the newest products, hands-on demos, inspiring trends, key manufacturers and industry suppliers, along with unmatched education and networking opportunities.

**Cevisama 2018**  
Feria Valencia - Valencia  
5 - 9 february 2018  
[cevisama.feriavalencia.com](http://cevisama.feriavalencia.com)

### A key business platform

Cevisama has already sold almost 75% of the space set aside for the upcoming edition, set to run from 5th to 9th February 2018. Cevisama's organizing committee met at Feria Valencia to assess the progress of sales and the objectives for the next edition of the fair. According to Manuel Rubert, president of the ceramic tile

and bathroom show, "the outlook is very positive and indicates that, after a number of very hard years that ensued from the crisis, the economic recovery is now a fact." In Rubert's opinion, "the sales figures are evidence of companies' commitment to and belief in Cevisama and confirm the fair's potential as an international showcase and key business platform for Spanish manufacturers".

### Stronger than ever

The Shanghai New International Expo Center will be the meeting point amongst flooring professionals once more during this anniversary edition of Domotex Asia/Chinafloor that celebrates 20 years, from when it was first launched, in March 2018. With six months before the show, exhibitors from across the flooring industry are quickly securing their space at the upcoming edition, with over 80% of the show being already booked. The exhibition ground in 2018 comprises of 12 halls among which 5 are dedicated to carpet and rugs, 4 to wood, laminate, cork, bamboo, other hard floors and floortech, and 3 halls dedicated to resilient floorings for commercial, industrial and residential

purposes along with more than 15,000sqm of outdoor exhibiting space. Special areas will be created for all exhibitors participating in the InnovAction program, the flooring platform that enables them to launch their newest products. Domotex Asia/Chinafloor 2017 gathered 1,364 exhibitors from 40 countries and attracted 54,529 trade visitors, of which 12,812 international, coming from 100 nations. The 2018 edition that marks 20 years of Domotex Asia/Chinafloor in the region is expected to become a unique point of reference for all flooring professionals from around the world as it continues its successful route offering the flooring world a unique platform to access and do business in Asia - Pacific, the biggest flooring market in the world.

This extraordinary flooring is sourced from the tallest trees in the forest and is modeled with a single cut to highlight the exceptional dimensions and magnificent grain along the entire length.

# THE BEAUTY OF HARMONY

TEXT  
ANNA BARONI

Widespread use of colour and well-designed spaces are what make a home a combination of beauty and well-being. Without doubt oak, with its soft amber colour plays a part.

Facing onto one of the most picturesque parts of the Adriatic Sea, Molfetta (Bari, Italy) is an ancient crossroads of peoples and culture. Starting from the port along one of the atmospheric artistic and historic routes, the inhabitants have a sense of hospitality and mingling which is reflected not only in the intricate urban planning but also in the choice of homes in the many residential areas. It was the welcoming, relaxed atmosphere breathed on the streets which was the main inspiration for an apartment which brings together different materials and ideas in a single, harmonious unit. The apartment was designed by Marco Tassiello and is situated in a luxury building complex. It has a total surface area of 200 sq. m. on one level. It has been planned to preserve the exquisite features of the existing structure while keeping the distribution plant intact and paying particular attention to home comforts and low management costs. However, the desire to build a stable relationship between living and linking areas has given a new interpretation to the relationship between the different spaces, matching interiors to exteriors to make them more livable and useful to the whole structure.

## OAK FOR FLOORS AND WALLS

With its pleasing, relaxing tones, the living area has been designed and planned to be an airy space in which natural light helps to illuminate every detail of the minimal decoration. The pleasing irregularities in the oak, which is Magellan Voyage from the Woodco Alpen Parkett Timeless collection, which has been used not only for floors but also on some of the walls, add movement to the surfaces by creating unexpected light reflections in the living area and through to the adjoining kitchen. The latter links the night and day areas and gives the impression of balance and harmony through the select use of different materials: glass and aluminium for cupboard doors, elm for wall-hanging surfaces and oak for the floor and the wine rack which is extended to form the spacious island container. Access to the night area is through a hall with sliding doors and moving panels all made in the same amber tones of the parquet, with the exception of the glass door which separates the kitchen and living area.

### PLAN

**Purpose:** private house restoration  
**Place:** Molfetta, Bari  
**Surface area:** 200 sq.m.  
**Architect:** Marco Tassiello  
**Interior design:** Marco Tassiello  
**Builder:** Gadaleta Ignazio  
**Floor-layer:** Onofrio Berloco  
**Wood floor:** Magellan Voyage parquet from the Woodco Alpen Parkett Timeless collection

*Photos: Gaetano Barile*

### THE FLOOR: WOODCO'S ALPEN PARKETT TIMELESS

The Alpen Parkett Timeless range is Woodco's most prestigious. It is a collection of three-layer parquet in the multi-faceted oak from Slavonia. Carefully crafted and produced using traditional carpentry tools, the collection consists of large panels available in three different widths (150/190/220mm) and three different lengths (1600/1800/2200 mm) which allow flexibility in the final design and personalized aesthetic effects based on individual stylistic preferences.

### Unikolegno

“Creativity, production flexibility and customer service have always been the distinguishing features of Unikolegno. Since its foundation in 1995 the company has added value to Italian quality with its wood flooring production, woodworking skills and care for the environment and people’s wellbeing. “Today we feel the need to return to a simple basic interpretation of raw material using innovative geometric patterns and laying methods that distinguish our new wood flooring collections. The recent Tris collection and the brand-new Twenty module, enhanced by the contemporary Genesis unfinished effect and Reagenti finishes, interpret and anticipate desires often only partially expressed by planners and designers”.

Gianni Dettori, export manager Unikolegno

[www.unikolegno.it](http://www.unikolegno.it)

**Stone by Loft collection** The refined herringbone point and French herringbone patterns highlight the beautiful natural grain of the wood and create a flowing theatrical effect for flooring in the Loft collection. The parquet is created with 2 x 30 and 45 degree angle cuts.

### Woodco

"For over 30 years, Woodco has endorsed the pursuit of quality living giving it substance in the sensory experience of wood, to bring into homes all the splendour of nature through high-quality, durable and reliable flooring. In the wide range of proposals, contemporary colours go alongside processes of timeless charm, where traditional joinery techniques enhance the characteristics of each type of wood. The choice of using only natural and ecological finishes demonstrates the company's green commitment, to protect the environment and people".

Gian Luca Vialardi, general manager Woodco

[www.woodco.it](http://www.woodco.it)

**Ego Nature**, with its genuine force and vigor, finds a place in the home thanks to Ego by Woodco, the modern interpretation of the wide-plank classic. The big size (1900/2200 x 240 x 15 mm) of this new collection of wood floor accentuates the highly tactile properties of the oak, with its distinct knots and veins enhanced by the marked wire-brushed finish. Ego is a solution for interior designs that explore different aesthetic and compositional choices, for bedrooms as much as for living areas. The very wide boards take center stage in the home, adding elegance and sophisticated details thanks to craftsmanship and quality finishes. Water-based stains and solvent-free oils and waxes are used to ensure an all-natural finish, creating a healthy and safe living environment.

### Chimiver

"It was in 1965 when Mr. Giovanni Panseri established Chimiver, a small laboratory producing coatings for wood and parquet floors. Today, Chimiver has become the undisputed market leader in Italy in the sector of products for gluing, treating and maintaining wooden floors. All this has been achieved thanks to the passion, tenacity and many sacrifices of Mr. Panseri and his wife Franca who's always being by his side supporting him. These days Chimiver is ran by his two sons Oscar and Nevio who with their distinctive but complementary skills have brought to the company new development strategies and ambitious goals. Customer focus, an immediate response to market needs and synergy among the staff are some of the ingredients that have motivated Chimiver to produce complete lines of products for different types of flooring: parquet, resilient, resin and outdoor. Chimiver products guarantee the highest level of quality on market thanks to highly automatic production systems and targeted inspection throughout the entire production process. Innovative solutions and continuous investments have enabled Chimiver to be present today in more than 60 countries all around the world".

Oscar and Nevio Panseri, owners Chimiver

[www.chimiver.com](http://www.chimiver.com)

**Ecotraffik 2K** Ecotraffik 2K is a two-component water-based outstanding wear durability PU finish for wooden floors, characterized by high solid content, easy to apply, high pore wettability even on brushed wood floors giving a warm and pleasant shade to the floor treated. Ecotraffik 2K has high abrasion and black heel mark resistances allowing its use for high traffic surfaces.

**Mardegan**

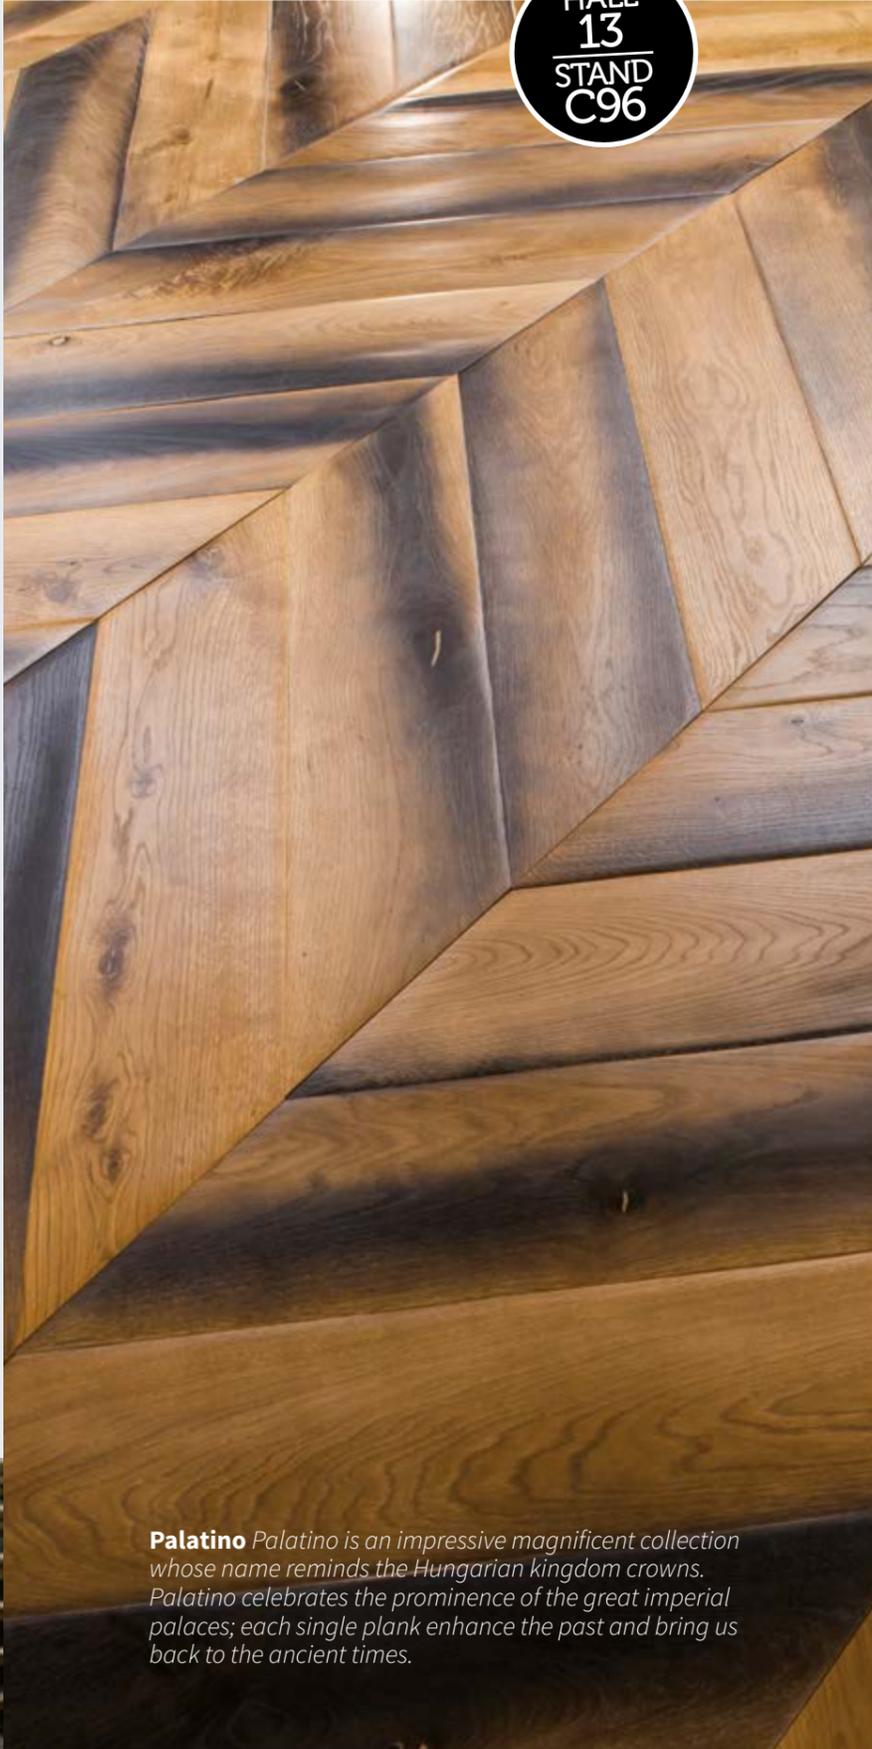

“Mardegan Legno has been established in Hungary to share its love for wood. Surrounded by forests where the air is pure you can deeply breathe the oxygen realized from the best European wood, the Slavonian oak, which has been used since ancient times for the construction of vessels and durable wine barrels. This is not only a love declaration for nature; it shows at the same time our moral responsibility towards nature: our Company is committed to provide a selection of surfaces starting from certified raw materials to respect the lives of trees and forests. Each working surface process is skillfully followed inside the factory from our master craftsmen. Starting from log selection to cutting trunks, from the lamella preparation to the layer assembly, finalizing with several handmade working surfaces possibilities, together with a wide range of colors and finishing choices. Mardegan Legno surfaces floor and wall, stairs and shapes keep inside the pursuit for the essential; all its finishes, absolutely handmade, look after an important aim: to enhance the beauty and the heart of one of the most fascinating material in the world: wood”.

*Giuseppe Mardegan,  
founder Mardegan Legno*

[www.mardeganlegno.com](http://www.mardeganlegno.com)

**Palatino** Palatino is an impressive magnificent collection whose name reminds the Hungarian kingdom crowns. Palatino celebrates the prominence of the great imperial palaces; each single plank enhance the past and bring us back to the ancient times.

**Tover**

“Tover has been growing on the international as much as the domestic market. After 10 years in charge of the Export Sales Department and a turnover close to 50%, I can say that this amazing goal has been reached thanks to our excellent team work and cooperation spirit. The Lab. listens to customers requirements and develops proper advanced solutions, the production guys work with the maximum attention and our logistics process is precise and reliable. Thus I can dedicate my time and efforts on finding new outlets and developing new partnerships, basing them on trust and care. I am really positive concerning the future; I think we are succeeding in this mission considering the excellent opinions collected among our distributors”.

*Marie-Claude Conversy-Tover  
Export Manager*

“Tover’s team of genius technicians are always inventing new products or new methods. Water based stains such as ‘Belle Epoque’ are now increasingly specified by designers offering endless colour options. Chetham Timber is proud to be associated with the Tover brand and is delighted to continue promoting their products on the Irish market”.

*Paul McGrath/Chetham - Ireland*

“Tover is constantly working on development of new products. They are flexible and innovative in order to achieve customer requirements and catch the delivery deals”.

*Samo Stefan/Alpod,  
Floor Expert - Slovenia*

“Tover is a product driven company who develops solutions starting from parquet fitters needs. Their aim is the highest possible quality, so you never get any complaints. Tover team is very nice to work with and open to my input. I have the feeling of really working together, not of being a customer”.

*Klaas Van Dyck /Woodmade - Belgium*

High quality, good service and technical support. Tover develops innovative products every year to keep us on top. Furthermore, the relationship between distributors and producers makes us a big family.

*Adrian Szeredko/Chemax - Poland*

*Antico Casale CP Parquet takes a search for new design solutions to Domotex. Thanks to a new format in the Antico Casale collection the elements of eight different sizes, strictly hand bevelled, can be mixed and matched to create attractive flooring with a retro air. The combination of different widths and lengths breaks up the classical pattern and gives more rhythm to the composition of the floor. Careful hand smoothing of the bevelled edges creates a camber that gives floors the charm of days gone by.*

**CP Parquet**

“Made in Italy with care, good taste and admirably crafted finishes. We are particularly proud that CP Parquet flooring is entirely made in Italy where we still have a deep-rooted feeling for the culture of woodworking and design.

We express our passion for things well made by applying painstaking care to details”.

*Nicola Lazzaron and Manuel Ghedin, export managers CP Parquet*

**Klindex**

“Thanks to its competence, Klindex assures to its customers efficient and good services. Moreover, thanks to the cooperation between the company and its customers, all the market demands are satisfied. All the projects are studied and supported by Klindex with up-to-date programs. Recently Klindex has reached another goal: the certification UNI EN ISO 9001: 2000 for *Design, production, sale of cleaning and grinding machines*”.

[www.klindex.com](http://www.klindex.com)

**Maxi Orbit Sander**

*Maxi Orbit Sander is the professional, innovative and multi-functional single-brush that makes working on all surfaces quickly and easily. The oscillating head adapts to all surfaces and allows for easy manoeuvres also on uneven surfaces, thereby minimising operator fatigue. Countless accessories available and the large wheels resting on the ground allow for the work to be simple and efficient. Thanks to the roto-orbital principle with high-frequency oscillations, Maxi Orbit is surprising for its excellent stability and manoeuvrability. The robust and compact frame, the ergonomic handle with reinforced rod, the large wheels, the light weight and*

*the release system of the main components (optional) make Maxi Orbit a durable machine but also one that is easy to transport. Thanks to its roto-orbital movement, Maxi Orbit offers excellent performance while simultaneously maintaining great stability and uniquely simple manoeuvrability, a level of quality that allows the machine to also be used by inexperienced operators or others with no particular physical strength. Thanks to the roto-orbital technology you can even work in homes with old electrical systems because the machine consumes less power than a traditional single-brush. Excellent not only for parquet but also for treatments and washing brick, carpet and marble.*

**LegnoAria+** Recent surveys about “well-being” have confirmed that contact with nature and a healthy environment are the principal features which define a “comfortable status”. Always devoted to physical and psychological well-being of people and answering to the more and more demanding requests of green building, Bruno Parquet has developed the new collection LegnoAria+. This is a natural oil finishing with 100% solid content and very low VOCs emissions. Laboratory tests carried out by Catas have proved that LegnoAria+ products comply with emission class labelling A and A+ according to French regulations, therefore they can be defined as VOC free. LegnoAria+ is an eco-friendly surface treatment which deeply penetrates and protects the wood, intensifying the soft and natural look of wood grains.

### Bruno Parquet

“The first company Bruno G.B. was founded in Mondovì (CN-Italy) in 1929 and dealt with sawing and wood trade. In the following years those activities have been integrated with wooden floor production and sale. More than 85 years of activity and three generations involved have made of Bruno a high qualified and professional company. Choosing a Bruno wooden floor means to choose a guaranteed product, the result of a tradition which has made the most of a natural resource such as wood. Bruno production offers a

wide range of wooden floors. A variety of products which meet any taste and any interior design need. “Custom-tailored” collections which offer versatile finishing with peculiar unique character. All Bruno products are CE labelled and comply with the standards required by the most recent European regulations on wooden floors. Moreover, Bruno has always stood out for its concern for the environment and for the social impact of its products. It is a “transparent” company whose aim is to communicate in a clear and precise way its wood supply chain in order to guarantee that the product has been made with rough material from sustainable forests”.

Marco Bruno e Guido Bessone, owner and sales manager Bruno Parquet

[www.brunoparquet.it](http://www.brunoparquet.it)

### Tecnostucco and Tecnopolistucco

*Tecnostucco is an epoxy filler, totally free from CMR, no unpleasant smell, no structural decreases, possible to re-varnish with any type of varnish, no emission, full adhesion on all types of wood essences. Tecnopolistucco, is a two pack filler paste, easy to work, based on unsaturated polyester resins. suitable to carry out works on wooden surfaces, like the reconstruction of defective parts even of big dimensions, fillings, trimmings, etc. It's possible to obtain any final thickness applying several layers allowing few minutes between them. It can be repainted with most of the enamels and stains available on the market.*

### Tecnokrom

“The world of Tecnokrom is the world of coatings dedicated to the finishings of high-end wooden floors. This solid relation was set up more than 50 years ago by the founder, Luigi Padoan. The non-stop research for improvement and product innovation is the daily mantra in Tecnokrom as the quality and the industrial craftsmanship of the product have a significant level of customization which comprises also the post-sales service to support the customers’ production lines at customers’ production plants. “We invest in Research and Development to offer customized and highly technological solutions to our customers and interior designers of the design and wooden floors markets, with great attention to environmental sustainability and the wellbeing of our collaborators. There is no stop to our commitment to Research and Development towards the excellence of our products. Nevertheless we remain loyal to our territory, to our history and to the Italian aesthetic”.

### Tecnik Wood

Tecnik Wood rediscovers through its passion and love for the territory the oldest building material: wood. The wood is strong, biodegradable, a source of heat, it is handy to work with and resistant over time. You can even bend it, returning to the original shape without losing elasticity. Tecnik Wood researches and studies every day this material respecting its needs and characteristics. We aim at finding a balance between this fundamental element of the Earth and the needs of those who love a natural and eco-friendly floor, rediscovering in the wood a material capable of expressing and reinterpreting your personal life style.

We recognize the value of wood importing timber from forests managed using sustainable development methods to protect the natural habitat, biodiversity, and the role that green areas play in protecting the climate, soil and water.

[www.tecnikwood.it](http://www.tecnikwood.it)

**Light and Ombre** Tecnik Wood offers the possibility to make your parquet special and unrepeatable, all thanks to a wood effect made with special equipment that replicates the craft planing each piece unique. Its uneven effect invokes the timeless classic style by enhancing space and reflecting the personality and originality of the person who chooses it. Classified between traditional floors but adaptable to modern, it creates motion thanks to its play of natural light and shadows. All products in our Assi Classiche line can have this treatment on request.

# 5 WAYS WOODEN FLOORING HELPS FIGHT CLIMATE CHANGE

Parquet flooring is highly popular nowadays because of its unique appearance and its durability. But did you know wooden flooring is also the number 1 flooring solution when it comes to nature - & environment protection, especially when it comes to fighting Climate Change and reducing CO2 emissions?

*Edited by Fep, European Federation of the Parquet Industry*

## 1. Reduction of CO2 through carbon storage in wooden flooring

Trees inhale carbon and exhale oxygen. That's basically the opposite of what humans do. We breathe out what trees breathe in and vice versa. A growing tree captures carbon. And, when the tree is processed, this carbon remains stored into the wood products, reducing the CO2 present in the atmosphere.

## 2. Reduction of CO2 through carbon sinks in sustainably managed forests

The European Woodworking Industries have a strict ecological forestry policy which means that they replant the trees they take for their activity. The more trees they use, the more they plant, because almost all of the European

wood that is used is sourced from sustainably managed forests. 'Harvesting' creates space for new growth - and this often happens at a rate of two trees planted for each one felled. Many more trees are grown than are currently harvested - since 1990, the European forest area has increased by 9% - so increasing demand has had a positive effect on the environment. The more Real Wood parquet is being used, the more new trees will be planted to take even more carbon out of the air.

## 3. Reduction of CO2 through substitution of less energy-efficient flooring solutions

The processing of wood and the production of solid wood flooring are highly energy-efficient, giving parquet an ultra low-carbon footprint. This opposed to other

materials such as plastics, LVT, or bamboo (which is grass and not wood) which require large amounts of energy during production. Wooden flooring itself works as an excellent insulator, as it has the cellular structure which allows to slow down heat conductivity. Keep in mind that wood flooring is not made of "dead trees" but remains a living product, which reacts to its environment. It doesn't matter if the wood is oak, beech or ash. It doesn't matter if the wood is nailed down, glued down, or floating. Regardless of the species and the installation method, all wood flooring absorbs or loses moisture as conditions change slowly or rapidly inside your home.

## 4. Eco-friendly heating

Wooden flooring will absorb the heating temperature. It will help to

keep the warmth in the rooms and will reduce heating costs/needs. Underfloor heating has become incredibly popular in recent years, providing a comfortable, cost effective and invisible form of heating. Provided that installation guidelines are carefully followed, wood floors and underfloor heating can work very successfully together. Once the system has been installed, the temperature shouldn't exceed 27°C in any area - between 20-22°C is ideal. Make sure to discuss this with a professional before choosing any type of flooring.

## 5. Recyclability

Wood is completely recyclable. In fact, it can be used in three different stages. Firstly, it is used to create a product. Secondly, the product itself can be recycled, and thirdly, it can be used for energy generation.

No other material can equal this, in terms of volume and economy. Old parquet can also be re-used to create new wooden items all together. Many contemporary interior designers are using this unique material to clad feature walls. Or to refurnish cabinet doors in kitchens. Check out this page in Pinterest with 25+ ideas on how to re-use parquet flooring. The environmental benefits of choosing real wood floors are indisputable. More CO2 is stored in parquet and far less energy is consumed in timber production, processing and disposal, than with any other construction material. And, after each wood harvest, the forests are replanted for the next generation, increasing the carbon sink and decreasing the CO2 in the atmosphere, contributing to mitigate Climate Change.

# SCM CELASCHI TM

## CELASCHI TM AND THE NEW LVT (LUXURY VINYL TILES) TREND

The new LVT (Luxury Vinyl Tiles) trend is enjoying more and more success as its comfortable, resistant, natural-looking surfaces can be installed in a wide range of locations and everyday living spaces: shops, offices, schools, hospitals, accommodation and entertainment facilities. From a technical point of view, LVT floor is known for its ease of installation and maintenance, certified wear resistance and durability. It is appreciated for its aesthetic qualities too, or better, for the wide range of finishes: wood, stone and other building materials. SCM has taken up this market trend by developing Celaschi TM, an integrated, ultramodern production line manufacturing

a high quality end product with outstanding dimensional precision. Celaschi TM is a lengthwise and crosswise profiler for parquet flooring. Designed to operate on multiple shifts per day, it can produce any kind of flooring with different materials or joints. Celaschi TM's latest generation technology offers production speeds that range from 30 to 170 pieces/min and a wide variety of piece dimensions: width from 58 to 450 mm and length from 300 to 6000 mm. Its state-of-the-art technology is demonstrated by the **profiling line for LVT flooring purchased by ALSAPAN**, a French-based company, owning some 210,000 m<sup>2</sup> of constantly-upgraded manufacturing facilities that annually produce millions of units of kit furniture, worktops and laminate, vinyl and parquet flooring, which are exported worldwide. The composition of the lengthwise and crosswise machines is the same: 6+6 machining head units 13 kW at 6000 rpm, exhaust hoods with

ionisation devices, centesimal positioners on magnetic bands and a pre-arrangement for painting units. The lengthwise machine is fitted with the new narrow CR43 rolling chain, to process, without lifting, **planks with minimum dimensions of just 90 mm, at a maximum speed of 150 m/min**. The crosswise machine, on the other hand, is fitted with the CR75 rolling chain with automatic insertion of dogs, to optimise production capacity according to the planks width. A hopper system is positioned between the two machines characterised by extreme flexibility, as it allows to process planks from 110 to 420 mm width automatically, a process that is accelerated by two belt devices with dogs with different pace, so that the machine feeding is always performed at the highest level of the production capacity. Furthermore, the hopper can also sort pieces of only 3 mm thickness, thanks to vacuum devices ensuring the perfect piece hold-down.

## CELASCHI TM NEW PROFILING MACHINE UNRIVALLED PRODUCTIVITY

Celaschi TM executes profiling at speeds from 40 to over 250 m/min, manufacturing parquet flooring of a wide range of materials and with different joints: solid wood or 2-3 wooden layers, MDF and HDF coated with melamine-laminated, ceramic, LVT, PVC and cork, with lengthwise and crosswise profiles with T&G, Click 2G and 5G joints.

Thanks to the **new feed chain**, Celaschi TM processes **planks with minimum width as from 90 mm at a maximum speed of 150 m/min**, for a performance at the highest productivity level with reduced costs.

# CEFLA FINISHING J-PRINT TD & SMARTPARQUET

BY SORBINI

Visit us at   
booth D04, Hall 013

The **J-Print TD** single-pass digital inkjet printer is the right solution for amazingly true-to-life digital printing with tactile 3D effects on large sized surfaces. The obtained effects include, among others, embossing, premium quality wood grains, exact reproductions of complex images and textures. Highly valuable finishes obtained through a digital embossing process, developed by Cefla Finishing in conjunction with Kuei. The special inks produced by Kuei for Cefla guarantee reliability

and cost-efficiency for the whole process, with product finish strength results similar in all respects to any other material used for the production of high quality flooring.

Excellent definition performance is also guaranteed, as **J-Print TD** can print up to resolution values of 400 Dpi and speed up to 50 m/min. In addition to flooring, many other products can be customised with this truly innovative technology, from furniture, glass and bathroom furnishings all the way to textiles.

**J-Print TD**, just like the entire line of latest-generation digital printers designed by Cefla, is the answer to the needs of all those who wish to increase their competitive edge in a constantly evolving market, ensuring flexibility and speed in responding to potentially endless requests in terms of decorations and styles, on a considerable variety of media.

**Smartparquet** by Sorbini is ideal for the application on parquets and other wooden floorings of natural oils, UV oils and coating products, urethane oils and traditional waxes, as well as pigmented products and stains. It is one of the most flexible solutions available commercially, designed for companies of any size that wish to respond to the changing needs of their customers - by increasing processing cycle efficiency and improving product quality.

**Smartparquet** is available in two configurations: a modular version that offers coating capacity up to 600 mm in width, and a 300 mm monobloc machine.

**Smartparquet** is the ideal machine for users who need to process small- to medium-sized batches and to configure their whole system in a modular and customised way - to easily manage the coating process according to their required work cycles.

## J-PRINT 3D TOUCH, IT'S REAL TO THE FEEL

The new J-PRINT 3D printer exceeds all expectations. Tactile effects as you've never experienced before. You won't believe your eyes or your fingers until you feel the result.

# CASELLI GROUP HBR 400

## HIGH PERFORMANCES AND EXCELLENT FINISHING RESULTS

Located in San Giovanni al Natisone, Caselli Group has been in the wood industry since 1920: it provides complete machines and machining systems, offering its customers integrated turnkey solutions, thanks to its constant commitment to the designing, creating and manufacturing of components. The company has a professional business department, constantly updated on the latest innovations, which operates dynamically on the international market. Our

professionalism extends also to the after sales service: our store is open to the public, supplies spare parts and accessories of the best brands and assists in choosing the best solutions to meet customers' requirements. A team of specialized technicians provides an emergency service, both in Italy and abroad. All this makes Caselli Group a dynamic partner with all the experience the market needs.

**HBR 400** Thin-cutting horizontal bandsaw flexibility precision productivity digital readout assures high accuracy cutting and convenient thickness control.

Variable speed is controlled by a frequency inverter and displayed on the control panel. Movable control box permits convenient operation control at any position. Allowable thickness range is 3-400 mm. Definitely the horizontal band saw model HBR 400, which is a user-friendly machine combines high performances with excellent finishing results.

# FEP: POSITIVE PARQUET CONSUMPTION TRENDS CONTINUE

The latest figures from the European Federation of Parquet Producers

The Board of Directors of the European Federation of the Parquet Industry met and discussed amongst others both the parquet situation and recent economic indicators on the European market. In general, the parquet business keeps on experiencing a moderate growth and benefiting from the encouraging developments of the economy, especially of the construction activity. When compared to the same period of last year, the provisional results observed for the first half of 2017 point to a continuation of the positive parquet consumption trends observed in 2016 and during the first quarter of 2017. These relatively promising developments are registered in all the countries where. The next Fep official appointment will be in Italy on 15 and 16 June with the 43rd European Parquet Conference.

**AUSTRIA** The Austrian parquet sales increased by 2% during the first semester 2017 compared to the same period last year. Nevertheless, the competition from other flooring solutions remains harsh.

**BELGIUM** The indications available point towards a growth of 2.5% of the parquet consumption during the first three months of 2017.

**DENMARK** The Danish parquet market keeps on growing by 1 to 2%, reflecting the performance of the Danish construction activity, especially for projects and ready-made houses.

**FINLAND** Parquet sales remain stable on the Finnish market, confirming that Finland is getting out of the red zone after several years of negative developments.

**FRANCE** The French market continues to experience positive trends. Parquet sales grew by an estimated 3% during the first semester 2017.

**GERMANY** Data indicate that parquet sales increased by 2% during the first semester of the current year, reflecting the very good performance of the construction sector.

**ITALY** Parquet sales rose by 1.5% during the first half of the year 2017, reflecting the positive economic developments observed in Italy.

**NETHERLANDS** The information received points to further significant improvements on the Dutch market sales rose by an estimated 7% during the first semester 2017, reflecting the performance of the housing sector.

**NORWAY** Compiled data indicate that the Norwegian market remains stable during the first half of 2017. Prices of apartments increased further during this period.

**POLAND** The information gathered points to a moderate increase by 2 to 3% of the parquet sales on the Polish market.

**SPAIN** The Spanish market remains stable. All indicators are positive and the expectations for the rest of the year 2017 point to a continuation or an improvement of this trend.

**SWEDEN** Compiled data point to a further significant increase by 3 to 4% of the parquet sales in Sweden during the first six months of 2017. This trend is supported by the stable development of construction projects.

**SWITZERLAND** Parquet consumption remains flat in Switzerland during the first semester of 2017. No significant increase or decrease of the market is expected during the second half of the year.

Wood. Dance to a different tune.

In defence of the original.

Wood used in building comes from forests with controlled timber felling. It is a completely renewable material which requires very low levels of energy in the production processes. A wood floor helps to maintain an ideal micro-climate inside the house, softens the falls of those just learning to walk and can be restored an infinite number of times.

Choose a wood floor.  
Sounds like music to your ears?
